

VIDHYA MANI

UI/UX Designer · Systems Thinker

+91 86107 17784 · vidhya.m.designs@gmail.com · [linkedin.com/in/vidhya-mani](https://www.linkedin.com/in/vidhya-mani) · vidhyamanidesigns.github.io/portfolio · Chennai, Tamil Nadu

UI/UX Designer with 6+ years of experience in complex systems, specializing in simplifying workflows into intuitive user experiences — bringing a systems-thinking approach to design that combines technical depth, user research, and interaction design to solve real-world usability challenges. Skilled in translating ambiguous problems into structured solutions, with a strong focus on usability, accessibility, and behavioral design.

UX/UI PROJECTS & EXPERIENCE

Clarity Mode — Trust & Transparency System for Claude | NextLeap · Graduation Project May – Jun 2026

Designed a trust and transparency system for Claude (Anthropic) — making AI confidence, uncertainty, and verification guidance visible at the moment of decision.

- Conducted a 4-layer research sprint — UX audit of Claude across 5 areas, competitor analysis of ChatGPT, Gemini, and Perplexity, and primary research with 30 survey respondents and 5 interviews.
- Surfaced key insight: 90% of users trust fluency over accuracy and 86% want AI confidence signals — with no competitor proactively solving this.
- Explored 3 solution directions via weighted decision matrix — selected Clarity Mode (32/35) over inline confidence chips and a trust dashboard panel.
- Designed Clarity Mode — a contextual transparency note with 3 sections (Confident About, Worth Verifying, Freshness Signal) and a full design system built on Claude's visual language.
- Validated via Maze with 5 participants — all 3 tasks completed, scoring 4.6/5; added Collapse by Default toggle based on user feedback.

AJIO iOS Redesign | Self-Initiated Case Study Apr – May 2026

Identified a key UX issue in deep product browsing where users get trapped in repetitive back navigation loops.

- Conducted competitive analysis across 3 direct competitors — Amazon, Nykaa Fashion, and Tata CliQ — across 5 dimensions to identify navigation patterns and platform inconsistencies.
- Developed the Smart Escape Menu — a contextual navigation system with 3 intent-based actions (Home, Categories, Back to Top) reducing navigation steps from 5 back-taps to 1 intentional tap.
- Designed end-to-end screens across 3 fidelity stages (paper sketches, mid-fi, hi-fi) — producing 5 final screens aligned with iOS patterns and AJIO's visual system.

Zoom for Education Redesign | NextLeap · Product Design Fellowship Feb – May 2026

Executed end-to-end product design across 4 milestones — research, interaction design, and high-fidelity prototyping.

- Redesigned Zoom for higher education — surfacing that 70% of students wanted more interactive classes — through 3 new features: Live Quiz, Anonymous Q&A, and AI-generated notes.
- Conducted primary research with 7 participants (6 students + 1 educator), synthesizing insights into 2 personas, journey maps, and usability improvements.
- Produced complete user flows across 3 fidelity levels (lo-fi, mid-fi, hi-fi) in Figma, including interaction states and a reusable component system.
- Validated designs through unmoderated usability testing with 7 participants via Maze — identifying 3 usability findings and iterating all 3 before final handoff.

PROFESSIONAL EXPERIENCE

Technology Analyst | Infosys Ltd

Jun 2019 – Present

- Resolved complex system issues as a Level 2 Administrator, improving resolution efficiency and reducing escalations.
- Planned and implemented workflow solutions, increasing resolution rates by 15%.
- Built and maintained ServiceNow dashboards and reporting systems, improving incident tracking visibility and reducing report generation time by 30%.
- Reduced service request fulfillment time by 20% through automation and optimized service catalog design.
- Delivered knowledge transfer sessions for 10+ team members, improving onboarding efficiency.
- Implemented role-based access controls (ACLs), reducing access-related support tickets by 15%.

SKILLS

Design: Figma, Miro, FigJam, Photoshop, Clip Studio

UX Methods: User Research, Wireframing, Prototyping, Usability Testing, Interaction Design, Information Architecture, Design Thinking, Competitive Analysis, Persona Development, Journey Mapping

Design Systems: iOS HIG, Material Design, Component Libraries, Responsive Design, Accessibility (WCAG), Mobile-First Design

Tools: Maze, Notion, Medium

EDUCATION & CERTIFICATIONS

UI/UX Design Certificate | Google — Coursera

May – Oct 2022

- Foundations of UX Design · Empathize, Define & Ideate · Wireframes & Lo-fi Prototypes
- UX Research & Testing · Hi-Fidelity Designs & Prototypes in Figma

Bachelor of Computer Applications | SASTRA University

2016 – 2019

CGPA 7.4 · Kumbakonam, Tamil Nadu

ACHIEVEMENTS

- Published 3 UX case studies across edtech, e-commerce, and AI product design — Zoom and AJIO on Medium and live portfolio; Clarity Mode (trust & transparency system for Claude) as NextLeap graduation project.
- Received Infosys Insta Award for creative documentation and knowledge sharing across the team.
- Received multiple client appreciations for quick resolution and accurate report generation.
